Chedeville® Rubber

Our proprietary 'Chedeville Rubber' is a more pure rod ebonite that recreates the great rod rubber of Pre-World War II legendary Chedeville mouthpieces. All the mouthpieces in the range made from this proprietary hard rubber will bear the 'CHR' mark. If

you don't see the symbol 'CHR' on the mouthpiece, it's not made from genuine 'Chedeville Rubber'.

Each mouthpiece is packaged with pouch in an elegant and unique bamboo canister.
